Glen Cove, N.Y. – April 26, 2022 – Joseph Pistilli, Chairman of the Board, of First Central Savings Bank ("FCSB", "the Bank") today reported significant performance achievements for the quarter ended March 31, 2022, highlighted by the Bank's record operating and cash earnings, continued momentum in year-over-year loan growth, excellent asset quality, and record net income.

Strong Operating Earnings Momentum on both Cash and GAAP Basis

The Bank's cash earnings were strong at \$5.5 million, or \$0.51 per share, for the quarter ended March 31, 2022, which represents an increase of \$3.3 million, or 150.0% from the quarter ended March 31, 2021. On a GAAP basis, net income for the quarter ended March 31, 2022 was \$3.7 million, or \$0.35 per share, compared with net income of \$1.1 million, or \$0.11 per share, for the quarter ended March 31, 2021. Due to the significant deferred tax asset recognized, the Bank is not required to pay federal income taxes until the Bank fully utilizes the remaining net operating loss carryforward. As such, significantly all the federal income tax expense on the income statement is considered a non-cash expense.

Joseph Pistilli, Chairman of the Board noted, "In the first quarter of 2022, First Central continued to build shareholder value by delivering continued earnings momentum and solid loan growth. In the past quarter we had record net income of \$3.7 million which surpassed our previous record net income of \$3.2 million in the fourth quarter of 2021. We continue to enhance shareholder value with an increase in our book value from \$6.10 per share at March 31, 2021 to \$6.95 per share at March 31, 2022, an increase of \$0.85 or 13.9%. I am extremely proud of the management team and Board of Directors that we have assembled at the Bank and the expertise they bring in growing the franchise value for our shareholders."

Paul Hagan, President and Chief Operating Officer, reflected on the Bank's results, "The quarter ended March 31, 2022, was another spectacular quarter highlighted by strong operating results. Management executed on its growth strategy that brought record net interest income, record loan sale income and record net income for the March 2022 quarter. However, the current economic environment with rising interest rates, inflation, and world turmoil poses challenges to the Bank going forward. Management will continue to generate commercial real estate loans and adjust its current residential growth strategy by originating more loans for portfolio as opposed to selling loans to the secondary market. The pricing in the secondary market for loan sales has become somewhat depressed due to rising interest rates. However, management will continue to evaluate opportunities to increase shareholder value."

Balance Sheet Growth

Total assets for the quarter ended March 31, 2022 increased by \$42.2 million to \$806.0 million as the Bank continued to originate commercial and non-conforming loans while continuing to sell a portion of the non-conforming loans to the secondary market. On a year-over-year basis, total assets grew by \$126.6 million, or 18.6%, driven by the Bank's robust loan originations offset by non-conforming loan sales. As of March 31, 2022, the Bank has been able to generate a non-conforming loan pipeline of \$145.7 million. Total loan portfolio growth at March 31, 2022 increased by \$95.1 million, or 16.3%, from the loan balance as of March 31, 2021.

Funding for asset growth during the quarter was primarily derived from deposits and borrowings from the Federal Home Loan Bank, ("FHLB"). On a year-over-year basis, total deposits grew by \$89.7 million, or 14.7%, as the Bank continues to grow deposits through their retail branches. The Bank has had incredible success in growing the non-interest-bearing deposits through non-conforming loan originations and the retail branches. As of March 31, 2022, total non-interest-bearing deposits were \$130.8 million or 18.6% of total deposits compared to \$97.0 million or 15.8% of total deposits as of March 31, 2021.

In addition to deposit growth, the Bank has used short term borrowings from the FHLB to fund loan growth during the quarter. This has been an effective low-cost funding strategy for the Bank. Due to the increase in loan sale volume, during the first quarter of 2022, the Bank used proceeds from the loan sales to repay short-

term borrowings. This allows the Bank to continually fund loans at low costs while growing the retail deposit base to support our asset growth. Total borrowings for the quarter ended March 31, 2022 increased to \$15 million.

The Bank's overall average cost of funds was 0.53% for the quarter ended March 31, 2022, which remained unchanged when compared to the quarter ended December 31, 2021. Management continues to be proactive in securing longer-term certificates of deposit in the current rising interest rate environment to better position the interest-rate-risk profile of the Bank in anticipation of even higher rates in the upcoming years. While this strategy of securing current longer-term funding at current rates is more costly than shorter-term funding, management believes it will better protect and enhance future earnings during the current rising interest rate cycle that is expected to continue in the years ahead.

Loan Portfolio and Asset Quality

For the twelve-month period ended March 31, 2022, the Bank's loan portfolio grew by \$95.1 million, or 16.3%, with the growth concentrated primarily in non-conforming residential loans. Management continues to employ a strategy of concentrating its loan growth in these products, which provides the Bank with traditionally safe credit quality at acceptable credit spreads, greater liquidity and an enhanced interest-rate-risk profile. Over the past twelve months, originations of the non-conforming product amounted to \$379.8 million. At March 31, 2022, the entire non-conforming loan portfolio amounted to \$297.9 million, with an average loan balance of \$636 thousand and a weighted average loan-to-value ratio of 58.6%.

As a result of the Bank's robust non-conforming loan generation capabilities, the Bank has been able to generate additional income by strategically originating and selling its non-conforming loans to other financial institutions at premiums. As of March 31, 2022, the Bank has \$145.7 million within the non-conforming pipeline with a weighted average interest rate of 4.97%. Due to the strong pipeline, the Bank expects that it will continue to originate for its own portfolio and others, which will result in a continued increase in interest income while also realizing gains on sale of loans. For the three months ended March 31, 2022, the Bank earned \$2.9 million in premiums on loans sold net of FASB 91 fees and costs.

The Bank's asset quality ratios are pristine and class leading among its peer group of community banks. At March 31, 2022, the loan portfolio had non-performing loans of \$3.2 million or 0.48% of total loans and 0.39% of total assets. During the quarter ended March 31, 2022, the Bank recorded a provision of \$600 thousand to account for the \$44.1 million increase in loans receivable. The total allowance for loan losses at March 31, 2022 was \$7.1 million and as a percent of loan receivable was 1.07% for the most recent quarter end.

Strong Net Interest Margin

The Bank's net interest margin remained strong for the quarter ended March 31, 2022 at 4.14% due to the continued origination of non-conforming loans at above market rates, prepayment penalties and loan fees of \$226 thousand, and effective cost of funds management.

Opportunities for First Central Savings Bank

The Bank's executive team and Board remain focused on enhancing shareholder value through prudent growth, tight expense control and further business opportunities. The Bank was granted regulatory approval to open a new branch location in Lynbrook New York. Management expects the Lynbrook branch to open in the second quarter of 2022.

Our mobile banking product allows customers to perform various banking functions including remote check deposits, "Zelle" money transfers, obtaining deposit account balances and transferring funds between accounts using their mobile phones. The continued implementation of application based mobile banking

software products enables the Bank to better compete with much larger financial institutions in the marketplace by offering the latest banking technology solutions. The Bank also expects to upgrade our core banking system in early 2022 which will enhance our customer experience.
